

Professional Development: Strives for the continuous improvement of the micro and nanotechnology workforce by identifying, disseminating, as well as delivering professional development.

2023 Plans: Monthly PD mini lessons: how to teach what we teach

PD Working Group

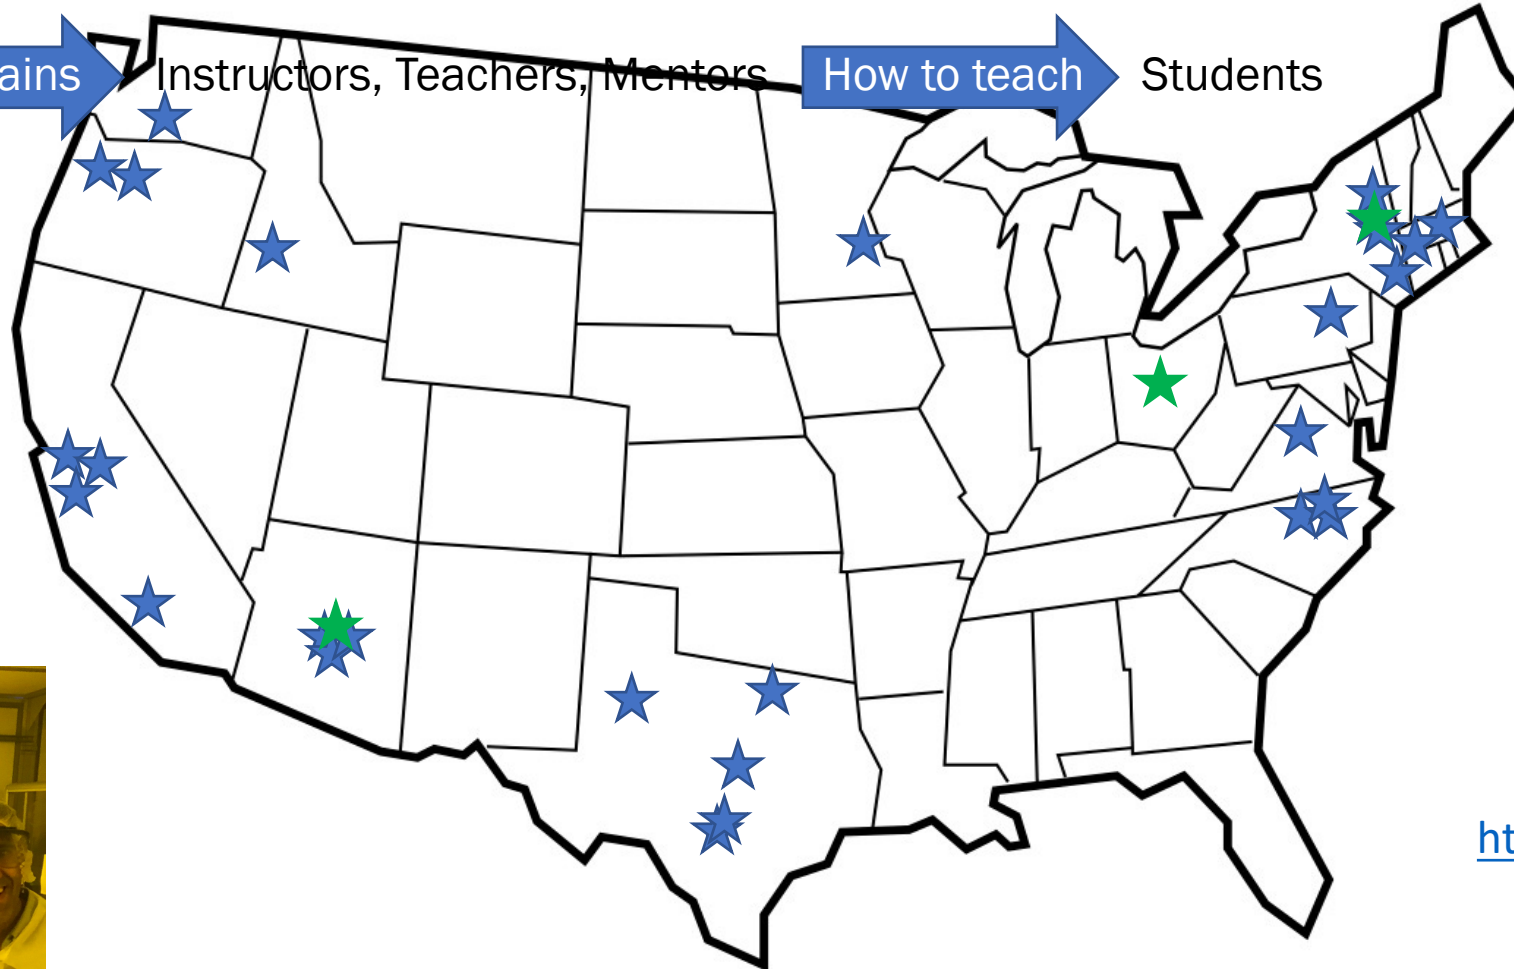

Trains

Instructors, Teachers, Mentors

How to teach

Students

The PD working group brings **50+ years of combined experience** in micro and nanotechnology education and workforce development.

The PD working group **needs your help and input** to shape the future direction of the workforce PD for the **100,000's of jobs** that will become available.
