

Distance Learning Working Group

MNT^eSIG Live! 2021

July 19, 2021

Mission Statement

- The Distance Learning Working Group fosters collaboration and learning opportunities in Micro and Nanotechnologies through high-quality, authentic learning opportunities that are accessible to students in multiple locations.

Working Group Goals

- Support creation of new programs and scaling efforts of existing programs using hybrid, online, and alternative lab modules
- Develop single curated online repository for distance education modules, classes, and programs
- Provide hybrid and alternative options for internships, workshops, and work-based learning opportunities through partnerships with industry and universities

Year Two Objective 1

Disseminate information and opportunities to students and parents about existing programs using distance education.

Year Two Objective 2

Develop a resource (webinar, seminar series, video, podcast) for educators about how to implement distance learning resources into their curriculum.

Year Two Objective 3

Pursue and promote co-enrollment partnerships for students from different programs using for-credit distance learning courses, modules, and certificate programs.

Year Two Objective 4

Support distance learning in collaboration with other working groups – Curriculum, Industry (BILT), Veterans/Skillbridge, etc.

Your project has created great resources!

Let's continue to use them!
